I am a Computer Science Undergraduate currently trying to land an internship.I am a computer science enthusiast with a strong foundation in programming logic.I love to write blogs and make video tutorials that help other students with their academics.

WORK EXPERIENCE

Intern

05/2017 to 07/2017

Delta Engg. Pvt.Ltd

Hyderabad

I developed a end-to-
end ticketing web app.Users can create account and enroll for various services using this web app. This web app keeps track about the availability of different services and notifies users upon successful enrollment.

As a part of this project, I wrote sql scripts to create database tables
to support features and integrating 3rd party services to web app to send notifications.

I faced a lot of challenges and also learnt a lot of new things while working on this project.I had a great working relationship with my intern mentor, in part because I felt that he genuinely cared about my growth. When walking me through tasks that I was unfamiliar with, he would teach me how to unblock myself instead of telling
me the answer right away. He also encouraged me to learn more
about the context of the work than was strictly required, and I appreciate how he was always willing to spend time explaining underlying engineering decisions in the areas I was curious about.

Software Developer

04/2018 to 12/2018

GGK Technologies

Uppal, Hyderabad

I was a part of web development & services team.My technologies Stack primarily included C# .Net,HTML,CSS & Bootstrap.
During my tenure at GGK I got to learn about different stages of SDLC, how agile works and lot of other new things.

SKILLS

HTML/CSS

Javascript

React JS

Core Java

C/C++

C# .Net

EDUCATION

Stanley College of Engineering
Bachelor's
Computer Science & Engineering (CSE)
Abids
06/2019 to Present
